

Declaration of Compliance Statement

Packaging and Packaging Waste Regulation (EU) 2025/40 (PPWR)

K Packaging Ltd hereby declares that, to the best of its knowledge, all packaging products supplied for the EU market have been assessed against the applicable phased requirements of the EU Packaging and Packaging Waste Regulation (PPWR), including those relating to material composition, recyclability, recycled content, and labelling.

As a distributor, supplier, importer, and reseller of packaging products, K Packaging Ltd does not manufacture the packaging it supplies. Accordingly, K Packaging Ltd relies on the technical, regulatory, and compliance information, declarations, and supporting documentation provided by the relevant packaging manufacturers and upstream suppliers to demonstrate conformity with the applicable PPWR requirements.

K Packaging Ltd maintains appropriate due diligence processes to obtain and review compliance information from its supply chain and will continue to monitor developments in the PPWR implementation timeline. Where required, K Packaging Ltd will work collaboratively with its manufacturers and suppliers to ensure that packaging products supplied to the EU market continue to meet the applicable regulatory requirements, including the 2030 and subsequent compliance targets.

Packaging Categories and Recyclability Summary

The packaging products supplied by K Packaging Ltd comprise a range of paper, plastic, foam and metal-based materials sourced from approved manufacturers and suppliers. Material composition, typical recycled content and end-of-life recyclability vary by product category.

Product Category	Typical Material Composition / Recycled Content	Typical Recyclability
Corrugated boxes, postal boxes, layer pads, postal tubes	Corrugated cardboard containing typically 70–100% recycled fibre	Widely recyclable through established paper and cardboard recycling streams
Paper products (white copier paper, paper mailing products, paper labels, water-activated paper tape)	Paper or kraft paper with recycled fibre content varying by product	Widely recyclable where uncontaminated
Flexible polyethylene packaging (bubble wrap, layflat tubing, pallet wrap, machine cast film, polythene products)	LDPE or LLDPE, typically containing 0–30% recycled content depending on manufacturer	Recyclable where soft plastic collection and processing facilities are available

Mailing bags and envelopes	Paper or plastic construction depending on product	Paper variants widely recyclable; plastic variants recyclable where suitable collection systems exist
Edge protection	Recycled cardboard or HDPE/PP plastic	Cardboard widely recyclable; plastic variants recyclable where facilities exist
Strapping products	Polypropylene (PP), polyester (PET) or steel	Steel widely recyclable; PP/PET recyclable where appropriate facilities exist
Metal products and tools	Steel and/or aluminium, sometimes with plastic components	Metal components widely recyclable; mixed-material products should be separated prior to recycling where practicable
Protective foams	Polyethylene (PE), polyurethane (PU) or expanded polystyrene (EPS)	Recycling opportunities are limited and depend on local infrastructure
Adhesive tapes	PP, PVC, paper or reinforced kraft paper	Paper tapes are generally recyclable with cardboard; plastic tapes are generally not accepted in standard household recycling streams
Cable ties and woven sacks	Nylon (PA66) or woven polypropylene (PP)	Recycling depends on specialist plastic recycling facilities and local collection infrastructure
Silica gel sachets	Silica gel contained within paper or Tyvek® sachets	Not generally recyclable through household recycling systems

Statement of Commitment

K Packaging Ltd will continue to monitor developments in the implementation of the EU Packaging and Packaging Waste Regulation (PPWR) and will work with its manufacturing partners and suppliers to obtain updated compliance information as future regulatory requirements come into force.

Through its supplier due diligence and document review processes, K Packaging Ltd is committed to supporting the supply of packaging products that meet applicable legal requirements and customer expectations for environmental compliance.
